Access Logs

ankitnarula1991@gmail.com

Access Logs

- Server access logging provides detailed records for the requests that are made to a bucket. Server access logs are useful for many applications. For example, access log information can be useful in security and access audits.
- Create Two Buckets & give Public Access
- Select ACLs Enabled
- Upload one bucket in the Main Bucket
- Go to Properties tab for main bucket

Access Logs

- Go to server access logging
- Click on Edit
- Select enable
- Select the target bucket
- Click on save changes
- Check the Log Bucket
