# Cloud Trail

- AWS Cloud Trail is an AWS service that helps us enable governance, compliance, and operational and risk auditing of our AWS account. Actions taken by a user, role, or an AWS service are recorded as events in Cloud Trail. All the activities can be tracked by user using cloud trail. By default only root user can see the event history. If IAM user want to see the event history we need to attach the role (Cloud Trail) to the IAM User

# Cloud Trail

- Go to Cloud Trail
- Click on Event History
- Download Events
